I have co-created state-of-the-art systems for Machine Learning, Graphics, Vision, and Computational Physics, exploiting hardware via DSL and using contemporary areas of Math and CS. My current focus is Federated Learning, a subfield of Machine Learning co-invented by my advisor in 2016¹. It has become a key part of the "US National Artificial Intelligence Research and Development Plan" in May 2023. My dissertation title is "Optimization Methods and Software for Federated Learning".

EXPERIENCE

August 2021

Research Scientist Intern (AI), [FACEBOOK INC.](#), USA, Menlo Park

After passing competitive interviews I have read several papers that [Dr. Hao-Jun Michael Shi](#) has recommended. We had several discussions and we've selected the research topic that is important to the company and at the same time for my Ph.D. The internship has not happened due to the absence of a J1 VISA.
